Engineering solutions for Your business. Together

Global capabilities, personalized approach

Our international experience has taught us to be adaptable in any context, consistently seeking the optimal solutions for the challenges we encounter.

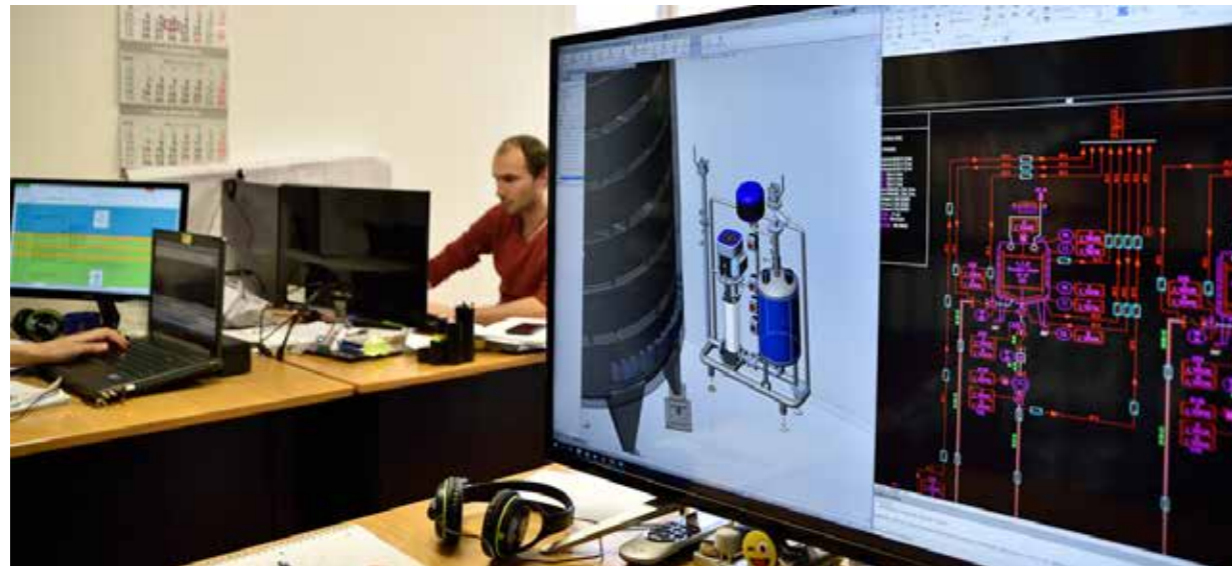

Engineering solutions
for Your business.
Together

Why RAP Group?

30 years of ongoing improvement

RAP Group started as a food equipment manufacturer in 1992.

As the different RAP Group departments evolved and gained expertise, they became stand-alone companies.

Integrated solutions for specific business needs

Process engineering

We develop and integrate turnkey industrial engineering solutions.

Industrial automation

Customized solutions for industrial automation and process control systems.

Real estate development

Real estate developer focused on industrial investment and development.

General contracting

General contractor for all types of construction: residential, commercial, industrial.

Stainless steel equipment

We manufacture a wide range of stainless steel products for different industries.

Construction installations

We provide industrial design, consultancy and execution for civil and industrial installation.

What we promise

Reliable partners

We promise increased attention at every stage of the project, transparent communication, respected deadlines and, in general, an honest attitude, ready to support you in making the most suitable decisions.

Efficiency first

We work efficiently, always trying to exceed our own quality standards. We are constantly improving our processes and are committed to providing our customers with the best experience.

Personalized approach

We treat every business relationship as a partnership, that's why we commit 100% to exceed expectations and contribute as much as possible to the achievement of objectives.

Our Mission

We develop and implement integrated engineering, automation, installation and construction projects, within the agreed terms.

Our Vision

We are a partner with global experience that has complete solutions for complex projects.

Our Values

Integrity and trust
Flexibility and innovation
Communication and transparency
Safety

Servicii

End-to-end project management and turnkey process engineering solutions

RAPTronic Process Engineering (RAPTronic) is a part of RAP Group and it started its activity in 1992 with delivering and installation of electrical and automation cabinets. In 1996 it continued with delivering complete technology projects consisting in designing and manufacturing of customized process equipment.

www.raptronic.ro

End-to-end project management and turnkey process engineering solutions

We develop innovative equipment and process technologies for clean production environments such as food, beverage and chemical industries.

- Custom equipment design
- Utilities systems for technology
- Project management
- Automation
- Process engineering
- Equipment relocations

Extensive experience in various industries

- Food and beverage industry
- Chemical, personal care and cleaning products industry
- Pharma

Services

General Contractor

Integrated general contracting services

Flawless turnkey projects

In our 15 years of operation, we have created a number of perfectly combined services to meet the most demanding challenges. In our general contracting work, we have created a strategy focused on resource optimization and keeping open lines of communication with the beneficiary.

www.rap-development.ro

Sustainable buildings for multiple industry sectors

We have the right team and the proper technology to design and deliver construction projects in all sectors: industrial and civil, public and private. Furthermore, we understand the specific needs of various fields, such as residential, commercial, medical or entertainment.

General contracting services

RAP Development offers full support in every step of the project, from planning to post-execution.

- Project management
- Site management
- Planning, execution, coordination
- Construction and rehabilitation works
- Infrastructure and exterior design
- Continuous support

Services

Industrial Automation

Integrated industrial automation solutions

Complete control over production

Our international experience has taught us to be adaptable in any context, consistently seeking the optimal solutions for the challenges we encounter.

www.rap-systems.ro

Industrial automation and process control solutions

- HMI (Human Machine Interface) Programming
- PLC Programming with Siemens and Rockwell (Allen Bradley equipment)
- Design and installation of Scada systems for large-scale processes
- Automation upgrade for existing production lines
- Full factory automation

Electrical control and command panels

Installation at the beneficiary's premises and commissioning

- Customized services for increased control over production
- Start-up and support
- Commissioning tests
- Complete setup

Services

Building Installations

Complete solutions for installation systems

Experts in installation systems

RAP Instal has put together a team of installation experts that will assist you in every step of your project - from consultancy and design to execution and maintenance.

www.rap-instal.ro

Type of installation

We will assist you in every step of your project - from consultancy and design to execution and maintenance.

-  High voltage installations
-  Low voltage installations
-  HVAC installations
-  Other types of installations:
 - Fire protection installations, water households, pumping stations
 - Sprinkler systems
 - Compressed air installations
 - Vacuum installations
 - Outdoor sanitary installations for water supply and domestic and rain sewerage
 - Indoor hydrant installations and underground and above-ground outdoor hydrants
 - Water-canal connections

Services

Real Estate Developer

The ideal space for industrial and residential buildings

Tailor-made solutions for successful projects

RAP Invest is an industrial and residential real estate developer. We offer optimally located plots of land to companies looking for relocation options or investment opportunities, as well as custom builds on long-term leases.

www.rap-invest.ro

Land plots

The land plots in the RAP Invest portfolio meet all the criteria for the start of a successful project.

- Accessibility
- Utilities
- Optimal location
- Urban proximity

Real estate development

Logistic spaces development

RAP Group's multidisciplinary experience gives us the right knowhow and resources to plan and develop turnkey logistics units.

Production and logistics spaces rental

We can identify and develop logistic spaces for long-term rental.

Residential real estate development

We have the proper knowledge and experience to develop premium quality residential spaces.

Services

Production

Stainless steel equipment for the most complex requirements

As reliable as steel
Manufacturer of stainless steel equipment

RAP Steel manufactures highly customizable stainless steel equipment for industries such as food, chemical, or pharma. From design to production, we are fully involved in every stage of a project, always striving to exceed expectations.

www.rap-steel.ro

Technological equipment, from design to execution

Production of technological process equipment:

- Tanks
- Silos
- Melting units
- Process Ducts
- Skids
- Stainless steel platforms

Services:

- Design and engineering
- Production according to the client's project
- Pre-assembly

Capacity:

- Welding column SMB 40/40 with two heads and linear rails
- Steel Cone rolling machine
- Tank & dish end polishing machine JT-2-IN-1
- Water jet cutting machine 3-axis
- 4 Cylinder Rolling machine

Projects

Sugar system upgrade

Our customer decided to upgrade its existing sugar handling system to be able to handle a greater capacity and also a large percentage of powder sugar. Target: Redesign and upgrade the existing sugar handling system assuring a higher capacity, powder content capability and high efficiency.

Project:
Food Industry
Location:
North-West EU

Innovative fat melting and handling system

(Re)Design, manufacture, test and supply new & innovative fat melting & handling system for fat. The system in the original location was posing a great amount of operating problems, generating frequent production stoppages. These (design) problems needed to be overcome.

Project:
Gum & Candy
Location:
Asia

Modulis

Modulis is the industrial park aligned 100% with EU standards and according to Romanian legislation. It represents a success project realized for the partner QUALIS PROPERTIES. The investment being a GREENFIELD type, we provided the entire “Design & Build” package for a total built area of 20,000 square meters structured in 10 halls.

Project:
Halls construction
Location:
Brasov, Romania
Built surface:
20.000 m²

Ertext International

A greenfield investment with a production hall, storage room, and office space totaling more than 8,000 square meters. The project began on an empty plot of land with no infrastructure, and the finished product was an industrial unit that was completely operational.

Project:
Factory, Warehouse, Offices
Location:
Brasov, Romania
Built surface:
8.000 m²

Mayr Melnhof Packaging

Construction of production hall extension - storage, office spaces

- External sewage, hydrants, rainwater installations
- HVAC installations
- Plumbing
- Installations of indoor, rainwater hydrants
- Humidification installation
- High current electrical installations, lightning arrester
- kV detection installation
- 20kV connection

Project:
Halls construction
Location:
Blejoii, Prahova
Built surface:
5.600 m²

Delaco

Extension of cold storage hall and social spaces.

- Mechanical installations external networks
- Plumbing
- Fire extinguishing installations
- Thermal installations
- Low current electrical installations: telephone/ data installations, access control installations
- High current electrical installations

Project:
Delaco
Location:
Codlea, Brasov
Built surface:
3.500 m²

Fresenius Kabi

Fresenius Kabi needed to relocate its main activity, the production and distribution of drugs and therefore RAP Invest concluded at the end of 2016 a “long term” pre-lease contract, in which the main terms were that RAP Invest would design and build, according to the beneficiary’s requirements, a pharmaceutical warehouse on a land of approx. 5000 sqm, located in Ghimbav.

Project:
Warehouse, Offices
Locație:
Ghimbav, Brasov
Built surface:
2.561 m²

URSUS Breweries Romania

The completion of the “Pump House: Intangible Water Reserve” contributed to strengthening production capacity and enhancing the critical infrastructure of the company in Brasov, Romania.

Project:
Pumps house; Water tank
Location:
Brasov, Romania
Built surface:
100m² Pumps building / 600m³ Water tank infrastructure
